

## BATF Assisted Suicide . . .

As fifteen agents of the Bureau of Alcohol, Tobacco, and Firearms searched the home of Allan Gillespie, 45, of Vero Beach, Florida, Gillespie sat down on his kitchen floor and fired a fatal shot into his skull.

Impossible? Incredible, you say? That's exactly what the official report of the Indian River County Sheriff's Office states. **Comfort of the suspect** was cited as the rationale for handcuffing Mr. Gillespie in front of his person, rather than behind his back, thus affording him the purported ability to gain access to "one of the many concealed firearms in his home" and ultimately turn it upon himself.

Thanks to the diligent efforts of Larry Lauger, Mr. Gillespie's brother-in-law, we were able to obtain the following official report of the Indian River County Sheriff's Office. We are working on getting the BATF version....

Helen Reed-Johnson

INDIAN RIVER COUNTY SHERIFF'S OFFICE  
INTERNAL AFFAIRS SECTION  
INVESTIGATIVE REPORT  
IA Case # 96-17  
Agency Case # 96-57549

Investigator Lieutenant Phil Williams

On July 10, 1996, Sheriff Wheeler assigned Internal Affairs to investigate a death that occurred at 435 10th Place SW. Initial information was that Alan Gillespie, the resident, expired during the service of a search warrant at the residence. Initial information also furnished names allegedly involving Indian River County Sheriff's Office (IRCSO) personnel, and provided information that an investigation was currently underway by Indian River county Sheriff's Department criminal Investigations division (CID) unit to determine if any criminal elements were involved. Lieutenant Mike Dean, representing CID, briefed Internal Affairs as to the developments thus far, and tentatively advised that his division had discovered nothing that implied that any laws had been broken by any involved law enforcement parties.

The afternoon of July 10th, Special Agent Edward Hemseth<sup>1</sup>, a representative from the U.S. Treasury Department Bureau of

## Have We Been Here Before? (October 1929)

By: L.S. Barrel

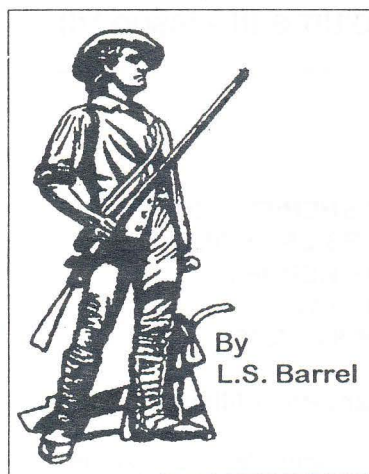

- 1993: The poverty rate in the United States rose to its highest level in ten years according to the Census Bureau. There were 39.3 million "poor" Americans (15.1% of the total population with poverty being defined as an income below \$14,763 for a family of four).
- 1994: Albert Sindlinger, a private economic researcher, stated that phantom jobs have made job statistics from the Bureau of Labor virtual nonsense. Sindlinger explained that a "bias factor", or a corrective factor, was included in the calculation of job statistics. Back in the early 1980s, the bias factor properly measured the rate of job creations; this was due to tax cuts which stimulated the economy and created new jobs. Since 1990 however, many companies found that they could make profits not only by expansion (increased sales) but also by mass layoffs of their workers in the name of cost-cutting.
- 1995: In January 1995, Federal Reserve Chairman Alan Greenspan testified before Congress that the nation's economic gauges were flawed. Errors in the Labor Department's Consumer Price Index (CPI) caused over-payments in government benefits that ran into the billions of dollars. Eugene Sherman, an economist with the Wall Street investment firm, M.A. Schapiro & Co., stated "In all candor, this is NOT a news flash. We've been coping with their accuracy, or lack thereof, for decades."

Over the past decade more than three million Americans were put out of work. Leading the list of former employers: IBM - 63,000 jobs; Sears - 50,000 jobs; AT&T - 40,000 jobs; United Technologies - 33,000 jobs. Not only were the national economic numbers misleading, but the regional numbers were also flawed. Theodore Tung, Chief Economist with National City Corp., criticized the method used to calculate the unemployment rate for the State of Ohio. The state's method involved calling 1,200 people around the

## 7.62 mm NATO (.308 Win.) M-14/M-1A Rifles

The M-14 rifle was developed as a product-improved, magazine fed replacement for the M-1 Garand rifle that was used during WW II and Korea. Like its predecessor, the M-14 has a reputation for exceptional accuracy at distances of up to 1,000 yards. Deployed during the Vietnam conflict, it is still in the military inventory today as a sniper and match rifle.

To zero this rifle using 147 grain FMJ ammo (like the military), set up a target at 25 yards/meters. If your bullet impact is 1.8 inches HIGHER than your aiming point, your rifle is now zeroed for 500 yards/meters. If your distance to the zero target is in yards, your long range is in yards (the same holds true for zeroing in meters).

Now to set your sights for other distances. Without moving your rear sight aperture - loosen the LEFT screw on your elevation knob, rotate the outer scale ring to the 5 mark, and then tighten that left screw back down snugly. Now your left (elevation) knob is calibrated for most distances. Want to shoot and hit a target at 300 yards/meters? Put the 3 on the elevation knob beside the index line on the receiver and shoot. You should be on the money, other than a windage problem.

I've included a diagram of aiming points for a full man-sized target to show where to aim to hit the target in mid-chest with a rifle whose sights are set for zero at 500 yards (using .308 MATCH ammo).

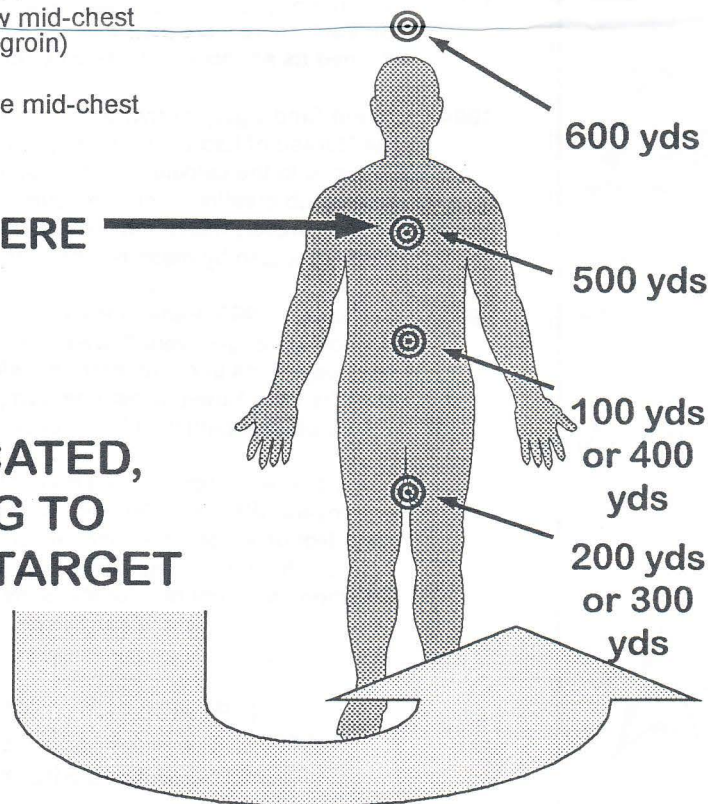

NOTE: This data was developed by the USMC Sniper School at Camp Pendleton during the Vietnam War, using US GI Match grade M-118 7.62 mm ammo, with the 173 grain FMJBT bullet. Interestingly the currently available Federal brand 168 grain BTHP .308 GOLD MEDAL MATCH ammunition has virtually the same performance characteristics. The MATCH ammo does shoot to a different point of aim than the previously mentioned 147 gr. FMJ ammo (requiring a trip to the range to shoot at a 500 yard target to get the rifle truly zeroed-in at that distance with the match ammo). Don't despair, you can shoot the 147 gr. FMJ ammo with the same hold-off because the lighter bullet's increased velocity produces (to within 2 inches) the same trajectory as the match ammo. If you've zeroed with the 147 grain ammo, shoot the 147 grain ammo. Just don't try using the match ammo with the 147's sight settings - you'll miss the target and be wasting your ammunition.

Without changing from the 500 yard sight setting, to hit mid-chest at:

100 or 400 yards	AIM at the belt buckle
200 or 300 yards	AIM 18 inches below mid-chest (about 3" below the groin)
500 yards	AIM mid-chest
600 yards	AIM 26 inches above mid-chest

**TO HIT TARGET HERE**

**AIM AS INDICATED,  
ACCORDING TO  
DISTANCE OF TARGET**

PREPAREDNESS

## 5.56 mm NATO (.223 Rem.) AR-15/M-16 RIFLES

Studies done by the Germans in WW I and WW II AND by the US in WW II and Korea found the following:

- The average infantryman's average shot in combat seldom exceeded 90 yards. A long shot was over 150 yards.
- The average sniper's average shot in combat was rarely beyond 175 yards

**NOTE:** In both instances the terrain and the skill of the soldier in using cover and concealment kept the engagement distances close. Did you know that the FBI's Hostage Rescue Team's longest "for the money" shot, prior to Ruby Ridge, was only 77 yards?

One of the reasons that the US military adopted the .223 cartridge was that it and its rifle weigh so little. A long time ago the military determined that the average soldier could only carry a maximum load of 70 lbs. and still be able to function in a combat environment. Of that 70 lbs. load, 17 lbs. were to be weapons and ammunition. The heavier the gun, the fewer the number of rounds that could be carried as part of a standard load. Any weight savings on the gun and ammo combo adds up, allowing you to carry more ammo for a given amount of weight.

17 lbs Standard Load	WW II / Korea	.30-06 Garand and 54 rounds
17 lbs Standard Load	Early Vietnam	.308 M-14 and 100 rounds
17 lbs Standard Load	Later Vietnam	.223 M-16 and 240 rounds

One of the other reasons the military adopted the .223 is that it is a flat shooting cartridge. If your rifle is zeroed for 250 yards/meters, then from the muzzle to 300 yds./m. the bullet will not be above or below the line of sight by more than 2.1 inches. In other words, if your target is less than 3 football fields away, put your sights on the target and you'll hit it.

That's nice to know but I can't find a shooting range that will let me shoot exactly 250 yards/meters. Okay, go to your range and set up a target at 25 yards/meters. Using 55 grain FMJ ammo (like the military), adjust your sights so that the bullet impact AND your aiming point are the SAME. If you're zeroed at 25 yards/meters, you're also zeroed at 250 yards/meters ! (If you zero in yards, your distance is in yards; the same is true for zeroing in meters.)

I've included a diagram of aiming points for a full man-sized target to show where to aim to hit the target in mid-chest with a AR-15/M-16 rifle whose sights are set for zero at 250 yards/meters (using 55 grain FMJ ammo).

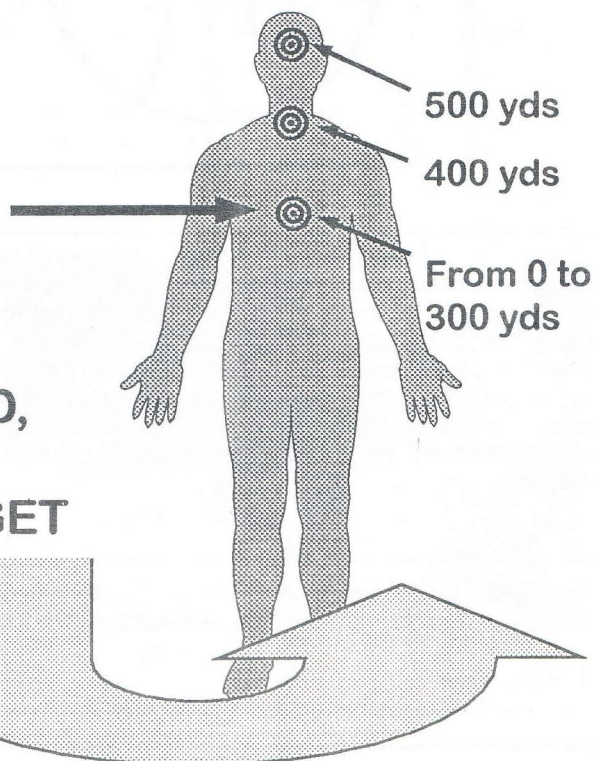

Without changing from the 250 yard sight setting,  
to hit mid-chest at:

0 to 300 yards/meters  
400 yards/meters  
500 yards/meters

AIM at mid-chest  
AIM level with the shoulders  
AIM at the top of the head

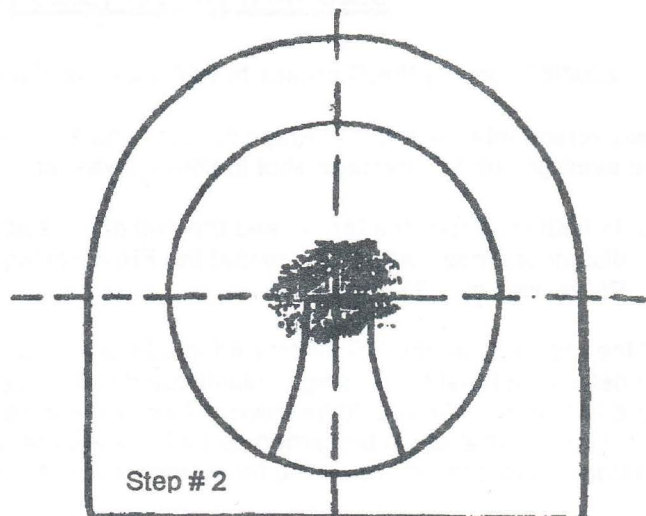

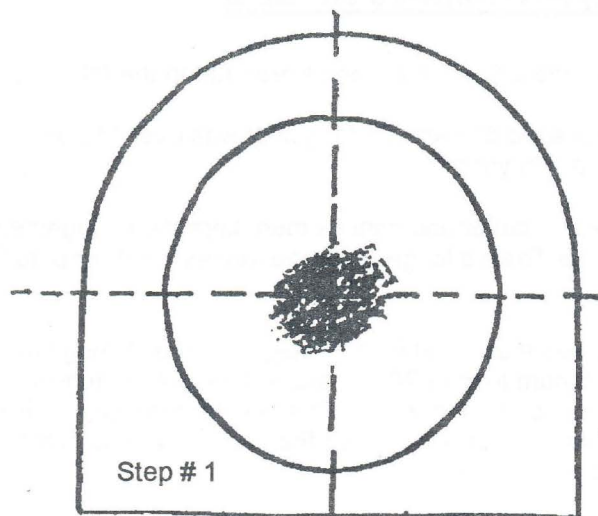

**TO HIT TARGET HERE**

**AIM AS INDICATED,  
ACCORDING TO  
DISTANCE OF TARGET**

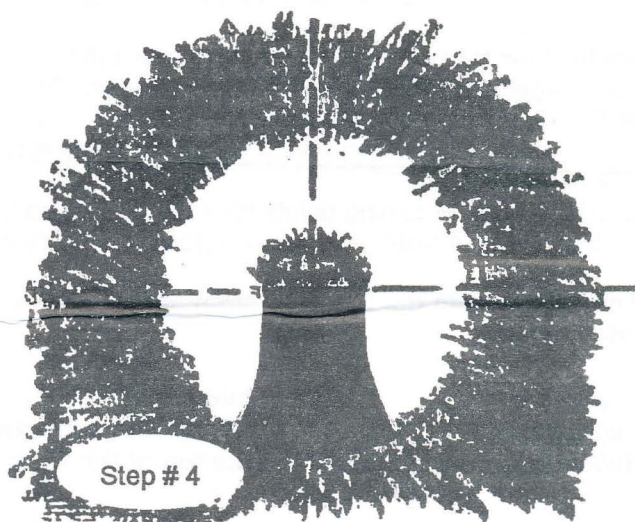

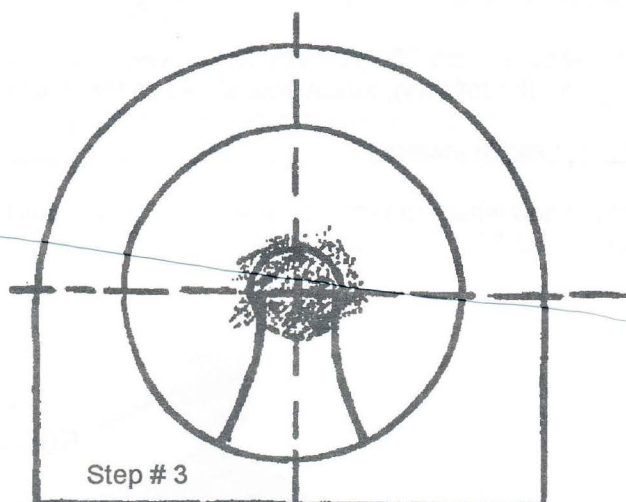

## FOUR EASY STEPS TO MASTERING THE USE OF MILITARY PEEP SIGHTS

Look through your peep sight at a bright wall or the sky (on a non-cloudy day). Do NOT allow the front sight to come into view. Do you see the small "fuzzy" in the middle of the rear sight? Some people see it as a blur, others see a gray or a blue-gray object. This "fuzzy" is the OPTICAL CENTER of your rear sight.

Add the front sight to your view. Notice how your eye automatically put the tip of the front sight into the middle of the "fuzzy"? Your eye likes having things lined up (the optical center of the rear sight is now aligned with the front sight).

Let's add a target into your sight picture. Again, you'll notice that your eye has automatically put the target into the optical center of the rear sight and at the tip of the front sight. By now your eye is getting tired. Do you see a squiggly, worm-like object in the sight picture? (Usually crosses your vision diagonally) The surface of your eye is starved for oxygen and you are watching a blood corpuscle go across the cornea of your eye. Relax, blink your eyes, and look at something else for a few seconds ... give your eyes a brief rest.

As you may have noticed briefly at step # 3, your eye was going berserk trying to focus on the target, the front sight, and the rear sight all at the same time. You can't do it ... it's physically impossible for your eye to focus on three different objects at three different distances at the same time. Since the front sight determines where the bullet goes, focus on the front sight (fine tune it like your TV set so the front sight is sharp and clear). The target will get a little fuzzy and you will hardly see the rear sight for the blur (this is OK because it means you have focused on the front sight). Congratulations, you now have a perfect sight picture, using peep sights!

Shooting is a skill of consistency. IF you do everything the same way, everytime you fire a shot ... you'll hit the bullseye everytime (in theory at least). One more time, real quick on the four steps:

- 1.) Find the blur
- 2.) Put the front sight in the middle of the blur

- 3.) Put the target at the tip of the front sight
- 4.) FOCUS on the front sight

**GOOD SHOOTING!**

**"IN THE FUTURE TINY CHIP MAY GET UNDER SKIN"** read the headline in the May 7, 1996 edition of the Chicago Tribune. Staff writer Jon Van reported, "A tiny chip implanted inside the human body to send and receive radio messages . . . is likely to be marketed as a consumer item early in the next century." He goes on to say that "several technologies already available or under development will enable electronics firms to make implantable ID locators, say futurists, and our yearning for convenience and security makes them almost irresistible to marketers." Bernard Beck, sociology professor at Northwestern University said, "People accept that increased communications makes life more convenient at the same time that there's no hiding place anymore. If I have a universal ID implanted, I can cash a check anywhere in the world. There's no worry about credit cards being stolen. These are attractive matters."

A representative of the World Future Society said that although the potential problems with locator ID chips are huge, they may be inevitable. He said he believes that such chips will be voluntary at first but "things that are voluntary today have a way of becoming compulsory tomorrow."

Meanwhile, the Wall Street Journal reported a record trading day for the NASDAQ stock exchange on May 6, 1996 as a stock for a high-tech company, whose main asset is new biometric ID technology, soared overnight. The Journal said, "Comparator says the burst in trading volume is due to pent-up demand from plugged-in investors who knew that the release of the company's new line of biometric identity verification systems' was imminent."

The above secular sources confirm that the means now exist to usher in the infamous "Mark of the Beast" in which no human will be able to buy or sell without a "mark" or traceable implant. (Rev. 13:16-18) Of course, this is not something for believers to fear as the actual "666" mark is activated after the wonderful event known as the Blessed Hope (Titus 2:13) or "Rapture" [snatching away] of the Church, the believer's comfort. (1 Thess. 4:16-18) Remember also that ". . . God hath not given us the spirit of fear, but of power, and of love and of a sound mind." (2 Timothy 1:7)

"A tiny chip implanted inside the human body to send and receive radio messages, long a popular delusion among paranoids, is likely to be marketed as a consumer item early in the next century."

— CHICAGO TRIBUNE - May 7, 1996 —

*By: Paula Demmers*

---

Never before have I been so convinced that we are having a real impact on the wicked plans of those who wish to enslave us to their Godless Global Government. One need only look briefly at current events to recognize the handiwork of the enemy.

Media attacks have escalated; Churches, both black and white are being burnt to the ground; Patriot and Militia groups are being infiltrated by government agents hoping to lure members into illegal activity; Government and media perpetrated rumors of anticipated terrorism at the Olympic Games is clearly setting the stage to link any actual act of terrorism to Patriot and/or Militia groups; Long-standing relationships that presented a real force to be reckoned with have been torn apart in an effort to neutralize their effectiveness....

Christians need a discerning Spirit now more than ever as the enemy is walking boldly in our midst, patiently waiting to claim his next victory. We must be prepared spiritually for these attacks, as the enemy is cunning and searches out the weakness in his potential victims ... **DO NOT GO INTO BATTLE UNPREPARED!**

—Helen Reed-Johnson—

**Eph. 6:10-20 - King James Version**

- 10:** Finally, my brethren, be strong in the Lord, and in the power of his might.
- 11:** Put on the whole armor of God, that ye may be able to stand against the wiles of the devil.
- 12:** For we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places.
- 13:** Wherefore take unto you the whole armor of God, that ye may be able to withstand in the evil day, and having done all, to stand.
- 14:** Stand therefore, having your loins girt about with truth, and having on the breastplate of righteousness;
- 15:** And your feet shod with the preparation of the gospel of peace;
- 16:** Above all, taking the shield of faith, wherewith ye shall be able to quench all the fiery darts of the wicked.
- 17:** And take the helmet of salvation, and the sword of the Spirit, which is the word of God:
- 18:** Praying always with all prayer and supplication in the Spirit, and watching thereunto with all perseverance and supplication for all saints;
- 19:** And for me, that utterance may be given unto me, that I may open my mouth boldly, to make known the mystery of the gospel,
- 20:** For which I am an ambassador in bonds: that therein I may speak boldly, as I ought to speak.

## How to Find Out If The FBI or Other Federal Agency Has A File On You And How to Get A Copy For Yourself

### INSTRUCTIONS

To find out if you have an FBI (or any federal agency) file and obtain a copy of it, fill out the following form, have it notarized (you must sign it in front of a notary and provide the notary sufficient identification), and mail to the FBI (or other agency). A request should be sent to each field office that might have files as well as FBI Headquarters. Make a copy of your signed and notarized form for your records. Please note that it is a criminal offense to represent yourself as another in attempt of obtaining information.

### THIS FORM IS A PUBLIC SERVICE OF GLEN L. ROBERTS

You are encouraged to copy this form and distribute to others. Glen L. Roberts is editor of Full Disclosure. Glen L. Roberts, PO Box 1533, Oil City, PA 16301. Email: [glr@ripco.com](mailto:glr@ripco.com). Web: [http://pages.ripco.com:8080/~glr.html](http://pages.ripco.com:8080/~glr/html)

### Freedom of Information and Privacy Act Request

To: \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

This letter constitutes my formal request for information pursuant to the provisions of the Freedom of Information and Privacy Acts, 5 USC 552.

I am requesting copies of all information maintained by your agency that pertain to myself as described below:

Full Name: \_\_\_\_\_

Current Address: \_\_\_\_\_

Social Security No.: \_\_\_\_\_

Date and Place of Birth: \_\_\_\_\_

Former Addresses (use reverse if more space needed): \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_  
 \_\_\_\_\_

Date: \_\_\_\_\_ Signature: \_\_\_\_\_

I, \_\_\_\_\_ a Notary Public in and for the county (city) and state of \_\_\_\_\_ hereby certify that on the \_\_\_\_ day of \_\_\_\_\_, 19\_\_, before me personally appeared \_\_\_\_\_, who is known by me to be the identical person whose name is subscribed to, and who signed and executed the foregoing instrument. In witness thereof, I have hereunto set my hand and official seal this day and year above.

My commission expires: \_\_\_\_\_ Signature of Notary: \_\_\_\_\_

# Who Is Behind Outcome Based Education?

by William Bonville

Describing the character, theories and objectives of Outcome Based Education provides a basic understanding of the system that the government and its schools are foisting upon our children and families, like it or not. To obtain a deeper insight into OBE, however, it is necessary to learn something about the agents of change who are bringing OBE to you and your children. For that, we begin at the beginning with:

**B. F. Skinner:** a psychologist and learning theorist who gained prominence at mid-century. He developed the techniques of learning (operant conditioning) based on conditioning phenomena first analyzed scientifically by Pavlov. Skinner called his technique his "teaching machine." Like any machine, it can be used for good or bad, for meeting the goals of traditional education or for the goals espoused by OBE. Skinner thus developed the principles on which "Mastery Learning" was developed by:

**Benjamin Bloom:** Mastery Learning was the original name for the process known lately as Outcome Based Education, also known as Performance Based Education, or Restructuring. Educational theories used in OBE are based on Benjamin Bloom's Taxonomy of Educational Objectives. A curriculum, according to Bloom, "...may be thought of as a plan for changing student behavior." (p 14 of Ron Sunseri's book OBE: Understanding the Truth about Education Reform, Questar Publishers, P.O. Box 1720, Sisters, OR 97759) Bloom called it "Mastery Learning." Techniques for his new style of education are based on Skinnerian behavioral psychology. It focuses on stimulus-response conditioning, which lends itself neatly to indoctrination. It is an approach which comes out of Pavlov's experiments with a dog, which he conditioned to salivate when he rang a bell. He said the mission of education is to change the thoughts, actions and feelings of students. Bloom held that the desired outcome is "...formulating subjective judgment as the end product resulting in personal values/opinions with no real right or wrong answer." Bloom's theory thus denies that there are absolute truths and it makes everything relative. One idea is as good as another. With no absolutes, then the goal of good teaching is to modify the "thoughts, feelings and actions" of the student to some replacement system supplied by the educational system. Since that system is controlled by the government, the change is specified by the government.

**William Spady:** Based in Colorado, Spady is Director of the High Success Network and Director of the International Center on Outcome-Based Restructuring. He is the "father" of OBE. He works with the federal government, foundations, states and school districts helping them implement OBE. He is a sociologist with theories of "socialization" on global terms. OBE is designed to prove his theories. When asked by an interviewer if the system would promote patriotism or teach loyalty and allegiance to one's own country, he replied, "I don't know what Patriotic means."

According to Spady, we are faced with "a fragile and vulnerable global environment that requires altering economic consumption patterns and quality of life standards, and taking collective responsibility for

promoting health and wellness." The goal of education, Spady says, has to be to prepare students for that future. Learning results are what is important, and his premise is that all students can learn, and it is not important how long it takes, as long as the desired learning takes place. Since all will learn, grades are irrelevant in the new system. All get an "A". Competition in schools in his estimation is a negative influence impairing learning. He also believes that textbooks will be obsolete.

Spady's definition of an "outcome," found in the in-service training program for OBE teachers, is "The acceptable culminating demonstration of a significant learning behavior." Subject knowledge and concepts are not valid outcomes. In 1982 he observed that one of the four main goals of Mastery Learning is a "system of supervision and control which restrains behavior of kids. The outcome of the hidden agenda should be the fostering of social responsibility and compliance." These goals "transcend academics," and deal with attitudes and feelings. However, Spady rejected the term "Mastery Learning" because of its monumental failures, renaming it so that the system of OBE would not be rejected out of hand. He found that the elite in the educational establishment supported his ideas because they, like Spady, want education not to teach, but to revamp society.

**Shirley McCune:** senior director of the Mid-Continent Regional Educational Laboratory doing research for the U.S. Department of Education, was the keynote speaker at the Governor's Conference on Education called by President Bush. She told the governors that: "What we're into is the total restructuring of society. What is happening in America today...is not simply a chance situation in the usual winds of change... (it is) a total transformation of society... You can't get away from it. You can't go into rural areas, you can't go into the churches, you can't go into government or into business and hide." p 15-16 "...Schools are no longer in the schooling business, but rather in the human resource development...we have an opportunity to develop the kind of society we want." p 62 (References are to Sunseri's highly recommended book.)

The Mid-Continent Regional Education Laboratory is the organization that developed the key features of the OBE curriculum under the auspices of the US Department of Education, which under the Reagan administration was headed by T. H. Bell who was a primary figure in OBE research and development. Proof: G. Leland Burningham, Utah's state Superintendent of Public Instruction, wrote to Bell in a cover letter when applying for Federal funds to implement OBE in Utah schools. He wrote: "I am forwarding this letter to accompany the proposal which you recommended Bill Spady and I prepare in connection with Outcome-Based Education." In other words, Bill Spady was hired by Utah, at the behest of Bell, to prepare the state's OBE proposal. Burningham goes on to say that his proposal "centers around the detailed process" which "will make it possible to put outcome-based education in place, not only Utah, but in all schools of the nation... We will stand ready for regional and national dissemination of the Outcome-Based Education program." p 53 In other words, Bell was the fairy godfather for Spady's work in development and implementation of OBE nationwide. He was responsible for getting the restructuring process moving on the highest levels of government.

**The Federal Department of Education:** Following the initiatives begun by Bell, and led by people installed in the bureaucracy by Bell, the department has continued funding Spady and various state activities with grants, and providing a panoply of services to the states and individual school districts. It sponsored development of "Educational Quality Assessment," which is a test which students describe as "weird." Basically the test determines the values a child has, and measures how easy it would be to change them in that child.

The Dept. of Education in its report, Developing Leaders

for Restructuring Schools: New Habits of Mind and Heart, says "Restructuring (OBE) is the process of institutionalizing essential new beliefs and values in the school mission, structure and process. The aim of restructuring is educating all children for productive lives." It established "lead centers" in all states, the objective of which is to create "dissonance" and use it as the basis for justifying change. In other words: the plan is to get people so upset with education that they will accept OBE as a solution to the problems of education.

**The National Education Association:** whose Ten Cardinal Principles and staffers moved to the U.S. Department of Education to participate in drawing up Goals 2000 legislation. Among those participating in developing the Ten Cardinal Principles were Benjamin Bloom, David Rockefeller, George Bundy, and Michael Lerner, to name but a few. Among those participating in the work of the Carnegie Foundation, which supplied much of the impetus to the programs of the Department of Education, were the presidents of the NEA and the AFT (American Federation of Teachers). That brings us to:

**The Carnegie Foundation:** In 1986 it issued a report, *Teaching as a Profession: Teachers for the 21st Century*. It was basically the outline of a plan to nationalize education. Says Phyllis Schlafly, "The game plan is to define the problem so that it will point to a Carnegie-engineered 'solution,' establish a 'partnership' with prominent business leaders to give verisimilitude to Carnegie-written proposals, and then to persuade selected governors to push Carnegie's proposals through Congress and reluctant state legislatures." The plan was presented to Bush's Governor's Conference in South Carolina in 1986, where Bill Clinton of Arkansas and Lamar Alexander of Tennessee took the lead. (Clinton became president and Alexander was appointed by Bush to head the Department of Education.) The report calls for national certification of teachers (to get rid of independent private and home schooling), restructuring of schools to meet performance goals, and have nationally based education policies.

Included in the task force that produced the report were the presidents of the two teachers' unions: **Mary Futrell of the NEA** and **Albert Shanker of the American Federation of Teachers**. The Carnegie Foundation also owns the Educational Testing Service, which collects, scores and analyzes results of the Educational Quality Assessment tests given to three grade levels in each OBE state. It is joint owner and operator of the National Assessment of Educational Progress data bank that stores the data produced nationally by OBE. These tests are mandatory in schools, not voluntary, although it would seem so by the literature. The Foundation is also a primary source of funding for the Parents as Teachers Program, which has developed family-intrusive policies and techniques that bring parents and children into the OBE system for control from the moment of birth.

**The National Center on Education and the Economy:** among whose directors are Oregon's Vera Katz, plus David Rockefeller, Ira Magaziner and Hillary Clinton. This is an organization funded and controlled by the Carnegie Foundation, and is a central funding agency for grant money supporting OBE programs and experimentation using funds from the Rockefeller Foundation and similar sources.

**John Goodlad:** University of Washington and head of the Institute for Educational Renewal, doing research on strategies for reaching OBE goals. He is a one-worlorder and globalist, who wrote, "Parents and the general public must be reached... Otherwise, children and youth enrolled in globally-oriented programs may find themselves in conflict with values assumed in the home. And then the educational institution...comes under scrutiny..." p 17-18 Elsewhere Goodlad advises, "...Most youth still hold the same values as their parents and if we don't resocialize, our system will decay." p18

**Sharon Robinson:** appointed Asst. Secretary of

Education for the Office of Educational Research and improvement. A long-time staffer of The National Education Association, who sat with Hillary at the NEA convention and helped facilitate OBE.

**Hillary Clinton:** who with David Rockefeller is a director of the National Center on Education and the Economy, a non-profit group formed by the Carnegie organization to study and implement school reform. A long time and prominent "children's advocate," she assisted the President in making sure the proper people were brought into the federal educational leadership.

**Vera Katz:** Mayor of Portland, Oregon and former Speaker of the Oregon House, who introduced the Oregon education Reform Bill and was its chief sponsor, who also is a director (1987) of the National Center on Education and the Economy, chairman of its Nominations Committee, and represents Oregon on the New Standards Project. She was on the Board of the Carnegie's National Board for Professional Teaching Standards (1987). She sponsored Carnegie-related legislation in Oregon: HB 2020 (1987), Education Retention and Professional Development; and HB 2001 (1989) 21st Century Schools; as well as the Katz reform bill, HB 3565, in 1991.

**Norma Paulus:** Oregon's Superintendent of Public Instruction, who has been a leader in bringing OBE to Oregon and then implementing it. In June 1992, in her foreword to *Toward a National Standard*, a series of briefing papers intended to "support the development of OBE in Oregon," she refers to Spady. In Sept. 1992 she was a featured speaker at the America 2000 Leadership Workshop in San Francisco. Her Department of Education is participating in the national new standards project, in collaboration with the Learning Research and Development Center at the University of Pittsburgh.

**Michael Tucker:** sponsored 21st Century school reform in Washington State; senior advisor to Bill Clinton; co-director, National Alliance for Restructuring Education; director of one of eleven New American School design teams tasked to "reinvent" America's schools, and president of the Board of Trustees of the National Center on Education and the Economy.

**National Center on Education and the Economy:** Its mission is to develop policies on education and human resources. It developed out of the Carnegie organization. Its Board of Trustees include Michael Tucker (president), Mario Cuomo, Ira Magaziner, David Rockefeller, Hillary Clinton and Vera Katz. In 1990 this non-profit group published *America's Choice: High skills or low wages*. It described the workplace as one "managed by a small group of educated planners and supervisors (utilizing) ....administrative procedures (that) allow managers to keep control of a large number of workers. Most employees under this model need not be educated. It is far more important that they be reliable, steady and willing to follow directions." p 29-30 Why? Because, the report states, "More than 70 percent of the jobs in America will not require a college education by the year 2000." p 30 What is needed is "Workers who do what they are told, with a good attitude," says Ron Sunseri. How do you get them, Sunseri asks: "Start now teaching students, from the earliest grades, the attitudes and social behaviors that will please business and avoid a broad-based, high-quality, academic education."

In 1992 the group put out a confidential report, *The National Alliance for Restructuring Education: Schools—and Systems—for the 21st Century*. That report states (p 33), "Our objective is to make schools of the kind we have described as the norm, not the exception, first in the cities and states that are Alliance members, and later elsewhere. Getting there will require more than new policies and different practices. It will require a change in the prevailing culture—the attitudes, values, norms and accepted ways of doing things—that defines the environment that determines whether individual schools succeed or fail in the transformation process. We will know that we have succeeded

when there are enough transformed schools in any one area, and enough districts designed and managed to support such schools, that their approach to education sets the norms, frames the attitudes and defines the accepted ways of doing things in that part of the world. There is no turning back. The question is how to bring about this kind of cultural transformation on the scale we have in mind....and to organize (resources) in such a way that the growth of the new culture is geometric."

Professor Anthony Oerringer of Harvard University contends: "Do we really want to teach people to do a lot of sums or write...when they have a five-dollar hand-held calculator or a word processor? ...Do we really have to have everybody literate—writing and reading in the traditional sense?" p28

So what are these changes to be? As implemented by education, based on research conducted by the National Training Laboratory associated with the National Education Association, the technique is to supplant skill training with "sensitivity training." The goal, according to David Jenkins of the NTL, is "...to manipulate; (the teacher's) job is to plan and produce behavior in order to create changes in other people." Relative to your children, they may "appear to behave appropriately...(but) this appearance is deceptive... (They are) 'pseudo-healthy' persons who can benefit from sensitivity training." p 17 The NTL warned, however, not to be too up front about what is being done. Massel Smith of NTL advised educators: "Couch the language of change in the language of the status quo." p 17

Thomas Sticht, a member of the US Secretary of Labor's Commission on Achieving Necessary Skills, noted that many companies have moved their operations to places with cheap, poorly educated labor forces because "the dependability of a labor force and how well it can be managed and trained—not its general educational level" is what is important. He added, "Ending discrimination and changing values, are probably more important than reading and moving low-income families into the middle class." p 29

Sunseri Comments: "What Sticht is really saying is that we need more low-wage laborers in America. The only way to keep a pool of them available is to be sure that most students don't get educated. As long as the masses are poor and uneducated, the small cadre of highly educated, creative people can control them and have the kind of life they want."p 29 That this will pave the way for public acquiescence to the outcomes of NAFTA and GATT in about the year 2000 is an interesting coincidence.

Bill Clinton in 1979 initiated the "restructuring" reform of Arkansas schools and chose the bureaucracy to run it. After fifteen years of the system, the schools are presently 45th in literacy and 44th in standard achievement tests. He also started the "Governor's School" as a model for statewide school reform. The school takes the best and brightest students in the state and send them to a special Summer school, six weeks long, with 350 to 400 students attending each year. Mark Lowry, former director of publicity for the school, says the goal is to identify the four or five exceptional students suited to future political careers.

Lowery reports that the school does not deal in traditional academic excellence, but political correctness. It uses thoroughly scripted "brainwashing" techniques, including isolation from the outside world, to instill moral relativity and disintegration of family values. Students reported that they were fed a curriculum that focused on gays and gay rights, radical homosexuality, "all the things my parents said were wrong." Others reported, "We were encouraged to do what we felt like doing, to be hostile to Western Civilization and culture."

Lowery stated, "The greatest influence of the Governor's School is to promote the thought with these students that to be considered an intellectual by your peers...you have to be a liberal thinker." The school, he said, "invokes not only philosophy, but political thought, and that is the underlying message that

permeates the whole six weeks. This is not teaching or learning, but indoctrination."

A student reported that the main course at the school, two hours every day, was "Views of Man." It dealt with radical feminist, leftist ideology, and other radical thinking. The student said it was "warped," presenting one viewpoint only. Its goal was to "Convince students that they are the intellectual and cultural elite." It taught that it is OK to challenge authority because "you are part of the elite, and your parents wouldn't understand all this. As the elite, it doesn't matter what ordinary people believe or want. You know what is good for them."

Parents reported that their children came back from the school "terribly changed." One parent reported that it took two years of psychological deprogramming to restore their child to normal. Another said that her son committed suicide, and probably would not have but for the school. Another student reported his repeated fantasies of committing suicide, even to the point of writing a suicide note, because he loved the school so much he didn't want to be back in the real world.

Unfortunately, the "real world" of tomorrow is the world of OBE, courtesy of the Clintons and Katz, the Bushes and Bells, Paulus and Roberts, and most recently John Kitzhaber and Brady Adams, all loyal Democrats and Republicans, who cozied up to the elitists who understand better than you what you ought do with your life and how to raise your children. For your children it will be a life of lowered expectations and diminished returns.

B. K. Eakman, in *Educating for the New World Order*, quotes William Bonner, Attorney for the Rutherford Institute: "While the public has assumed it retains its historic input into education on a local school district level, in fact education has been progressively federalized, with the bold new America 2000 as the ultimate expression of the consolidation of power over education directed from Washington. The revised Chapters 3, 5, and 6 respond to Washington's demand that the states effect strict compliance with federal regulation in exchange for federal dollars. Freedom, diversity and local control are being increasingly sacrificed in that exchange."

"Undergirding this federalization of education has been a massive invasion of the family and the rights of individual students through curricula utilizing psychological programming and experimentation, as well as a broad spectrum of behavior modification techniques. Data periodically gathered through invasive testing within the affective domain has then, through the illegal demand for students' social security numbers...been compiled on computer systems storing vast amounts of intimate and private information on our children and youth, in violation of their constitutional rights..."

"The traditional interests and rights of parents have been trampled upon, as educators have proceeded on the proposition that professionals know better than parents how to raise children.... The results create a further attack upon the already weakened family units in our satchel. Both the assessment tests and the related curriculum increasingly reinforce the message that conformity to government-established values and attitudes is the key to future success in life..."

"The public does not understand that the government is establishing criteria to assess attitudes, values and opinions, nor do they understand that a 'planned course' will be introduced to 'remediate' attitudes, values and opinions not meeting government standards." p258-9

This is our future, compliments of the elite class of government bureaucrats and multi-national corporate managers and bankers who have given us OBE for the sake of the "Brave New World" they have in mind.

(Have We Been Here Before ... Continued from page 1)

state to ASK if they were employed. Mr. Tung stated "The state's numbers are not as representative as the national ones, which (also) are not perfect."

In December 1995, the Ohio Public Expenditure Council said that in 1994 government benefits were the second largest source of personal income in the state of Ohio. When the benefit payments were combined with the public payrolls, the government was the state's **LARGEST** source of personal income. (Could the government have a vested interest in maintaining erroneous economic data?)

1996: Consumer use of credit cards has surged, with the level of outstanding balances going up 40% in the past two years. Consumer credit (which includes **ALL** household debt **NOT** secured by real estate) topped on **TRILLION** dollars for the first time. The average Visa or Mastercard holder owes \$3,900; only about one third pay their credit card balances in full each month. The average consumer holds 8 to 10 credit cards and received another 10 solicitations for more cards in the past year. Of particular concern is the increase in home equity loans which have reduced the owner's stake in their homes; Homeowner equity in 1982 was 73%, but by 1994 it had dropped to 57%.

The National Taxpayers Union reported that the total tax burden (federal, state, and local) on a family of four now averaged 50.4%. Consumer installment debt as a percentage of after-tax income is at a record high of 18.8%. If auto leases and home equity loans are added to the consumer installment debt, it rises to 21.6% of after-tax income. Please note that these numbers do **NOT** include your basic living expenses like food, clothing, rent or mortgage payments, etc.

At this point I had planned to cover the coming stock market meltdown in some detail. However, the May, 1996 issue of *The McAlvany Intelligence Advisor* covers the topic far better than I can in the allotted space. You can obtain a copy of this issue by contacting: *The McAlvany Intelligence Advisor*; P.O. Box 84904; Phoenix, Arizona 85071. I consider the May, 1996 issue to be **must** reading, if you want to get an understanding of the coming stock market crisis.

If we have a stock market or economic collapse, where should you be financially? Obviously you should pay-down or get totally out of debt. Step one is to get out of installment (credit card) debt as soon as possible. Carrying a debt load like that, of 15% to 26%, can prevent you from buying **OR** keeping a home of your own.

You may not be able to payoff your mortgage, but by pre-paying on the principal portion, you'll get a better rate of return on your money than a bank will give you these days. You may want to consider cashing-in any 401(k), IRA, ESOP, or other retirement funds that are invested in the stock market.

**NOTE:** There are tax consequences involved in accessing retirement funds early, **BUT** it may be smarter to get some of your money out now while you still can, rather than risk a total loss later. If you cannot access the funds, you may be able to shift them into more secure holdings.

If you're in the market for a house but haven't bought one yet, you may want to consider reducing the size of your "dream home" down to the immediate-need level. Real estate agents, like stock brokers, make better commission money if you buy a bigger, more expensive home. They are less than likely to tell you that now isn't

a "great time to buy". Where is it written that real estate values **ALWAYS** go up? Certainly not in California, and not in the east-coast area over the last few years.

We've covered installment debt and housing, hopefully before the economy goes into the toilet. Economists also recommend maintaining a rainy-day fund equivalent to 3 to 6 months of your wages in savings and checking accounts, whenever possible. Beyond that amount of liquidity, you will probably want to have some of your money in precious metals ... gold and silver.

**WARNING:** There are two drawbacks to precious metals.

- (1) When you buy, there is a premium charge and when you sell, the price is discounted to the current trading price.
- (2) There are **NO** guarantees of price increases or continued legal ownership.

Gold is for asset protection. For example: Gold is at present trading for \$400 per ounce, which will purchase 400 loaves of \$1 bread. If in the future, bread should rise in price to \$5 per loaf, then gold should be trading a \$2000 per ounce; maintaining its value relative to bread. The biggest problem that I see with exclusively owning gold is who can make change if you only want to buy one loaf of bread? Which brings us to silver, the probable means of exchange in the event of an economic collapse. Historically, silver has been valued at the ratio of 16 to 18 ounces of silver per one ounce of gold. A quick look at the precious metals market index in the paper will dispel that notion ... perhaps silver is under-valued on today's market?

I brought up legal ownership of precious metals for a reason. During the New Deal era, the ownership of gold bullion was made illegal under an Executive Order by the President. There are no reasons to think that history will not repeat itself, and this time around it may possibly include silver bullion as well. The only exceptions to the illegality under the Executive Order were gold and silver in the form of U.S. currency. Based on past history, I'd suggest that the bulk of your precious metals be in the form of U.S. legal tender. Consider \$1,000 face value in pre-1965 silver as a likely amount to tide you through an economic crisis. More would be better, but to reduce bulk and weight, acquire gold coinage.

Daily-use commodities are another form of exchange. Common spices used in cooking for example. The phrase, "He's worth his salt", reflected both the value of the labor and the value of the salt. A military ammo can makes a good long-term storage container for spices.

I've spoken with people who grew up in post-WW II Germany regarding what was valuable for barter beyond currency. The normal items, such as tobacco and alcohol were mentioned, but also of high value were shotgun shells and .22 Long Rifle ammunition. While a box of shotgun shells was worth a live chicken, a box of .22 ammo was worth a full-cooked meal, since a farmer could use it to feed his family for a week on wild game. Petroleum fuels would be a great medium of exchange, except for the storage and shelf-life problems that make them a great deal of trouble.

Medical supplies, communications gear, long-term food supplies, and other items should also be considered for surviving an economic crisis. Let me point out that the most valuable commodity of all will be knowledge. Anybody can be a ditch-digger, but too many people are master plumbers. Invest in practical knowledge as a priority.

*(BATF Assisted Suicide ... Continued from page 1)*

Alcohol, Tobacco, & Firearms (ATF), who performs administrative investigation for ATF,<sup>2</sup> met with IRCISO Internal Affairs. Since investigative accuracy could be facilitated by both agencies being allowed interview access to each other's personnel, the interviews of involved law enforcement agencies were combined. ATF Agent Hemseth and IRCISO IA interviewed officers and agents, as follows: ATF Agent Dan McBride<sup>3</sup>, ATF Agent Barborini, ATF Agent Bill Jurison, IRCISO MACE Detective Gary Oliver, IRCISO MACE Detective Darin Jones, Vero Beach Police Department (VBPd) MACE Detective Ken Barrett, IRCISO MACE Lieutenant Ed Glaser, IRCISO MACE Detective Jim Hyde, Florida Department of Law Enforcement (FDLE) Field Supervisor Tim Elder<sup>4</sup>, FDLE Agent Jim Spiropoulos<sup>5</sup>, State Attorney Investigator (SAI) Steve Kirby<sup>6</sup>, and St. Lucie County Sheriff's Office (SLCSO) Detective George Miller<sup>7</sup>.

The interviews explored the initial developments of the investigation, which led to the issuance of the search warrant for Allan Gillespie's residence. All initial investigative developments of the probable cause used to obtain the search warrant, are the sole concern of the agency handling the case - in other words ATF. Sufficient testimony was given to determine that at no time prior to the search warrant service, or during the warrant service, up until Gillespie was observed sitting on the kitchen floor with a gun, was it a concern that Gillespie was mentally unstable, or suicidal. Agent McBride said Gillespie was talkative and cooperative. Prior to the search warrant service there was concern about both defendants being dangerous to law enforcement, since firearms were involved.

MACE Detectives first entered the investigation when ATF asked them to assist by determining the habits of both Gillespie and Robert Rosenzweig. This was in preparation for serving the search warrant. MACE Lieutenant Glaser acted as a liaison between ATF and IRCISO personnel. MACE Detectives established habits for the Gillespie family, and for Robert Rosenzweig, by doing surveillance. MACE Detectives did not meet either Gillespie or Rosenzweig during the surveillance - the surveillance was accomplished by watching vehicles and vehicle occupants come and go from the residences. The information was then furnished to the original ATF Case Agent that had requested the assistance, Agent Steve Barborini.

Lieutenant Glaser was contacted by ATF Agent Steve Barborini, and a subsequent meeting place was arranged for a pre-search warrant briefing that would take place at 5:00 AM the morning the search warrant was to be served. Lieutenant Glaser notified the MACE unit accordingly.

Focusing on the 5:00 AM meeting on the morning of July 9th, ATF Agent Barborini had obtained legal search warrants on both homes; 435 10th Place SW (Gillespie's residence), and Rosenzweig's residence in Sebastian. There are slightly different versions of some contents of the 5:00 AM briefing; however, there seems to be a consensus the ATF Agent Barborini was the main person giving assignments. Those assignments included which law enforcement personnel would go to which home (north or south). There is a consensus that ATF Agent Barborini expressed that ATF wanted a peaceful service of both of the warrants, which he hoped would influence both home owners to cooperate with the investigation. Further consensus was that the word "arrest" was not to be used during the initial stages of search warrant service, when Gillespie was placed in custody. There is a consensus that personnel within the room where the pre-briefing was held, were divided into teams for the south home (Gillespie's), and teams for the north home (Rosenzweig's). Plans then began within the two

teams to determine the assignments at each residence, and how entry was going to take place at each residence. There is a consensus that no one was specifically assigned to guard, or watch, the persons in custody while the warrants were being served.

Based on the previous surveillance observations, and subsequent instructions from ATF, Detective Jim Hyde rode with ATF Agent Riehl in a marked IRCISO patrol vehicle, to an area close to Gillespie's residence to await Gillespie's routine departure from the residence. Detective Darin Jones, who was in a position to observe Gillespie leave, radioed to Detective Hyde that Gillespie was leaving his residence. At about 6:50 AM Detective Hyde followed Gillespie to Father and Sons Appliances where Gillespie turned into the parking lot, then did a U-turn towards Detective Hyde's vehicle. Detective Darin Jones was also present in another vehicle. Gillespie stopped his vehicle, and was then secured. IRCISO Lieutenant Mary Hogan was also present as is indicated by her observations in her supplement CARE report. Detective Hyde searched Gillespie's person, and Gillespie's vehicle. There was a firearm in the vehicle, and no firearms on Gillespie's person.

There is a consensus that ATF preferred Gillespie be handcuffed in front due to the estimated time of the search warrant service being estimated at six hours or better, ATF's initial intentions to maintain Gillespie at the residence the entire time, and primarily due to his comfort and the hopes of influencing cooperation. The decision to handcuff Gillespie in front was confirmed by ATF Agent McBride. It was allegedly stated to Detective Hyde as Hyde began to place the handcuffs behind Gillespie after the initial traffic stop at Father and Son Appliances by accompanying ATF Agent Riehl.<sup>8</sup> The later information is according to Detective Hyde and supported by Lieutenant Hogan's CARE supplement.

There was no existing arrest warrant which demanded Gillespie's arrest at the time the search warrant was served; hence, sole discretion as to preferred degree of mechanical restraint and custody had to rest with ATF, since IRCISO on it's own, had no case facts with which to generate an arrest. An examination of IRCISO policies concerning use of mechanical restraints do not demand that mechanical restraints of any kind be used in such circumstances. The manner in which Gillespie was handcuffed in the existing circumstances, is a matter of officer discretion, without current definition in IRCISO policy. Detective Jim Hyde and ATF Agent Riehl took Gillespie back to the residence to be searched at 435 10th Place SW, Vero Beach. There the consensus is that Gillespie helped them enter the residence by furnishing keys. Gillespie allegedly made some "cracks" at the IRCISO Emergency Response Team members saying they were, "Wanna be's." The residence was secured.<sup>9</sup> ATF Agent Barborini and SAI Steve Kirby escorted Gillespie to a dinner table inside the residence. The consensus is that a cursory search for weapons was done around the immediate area of the dining room table. Agent Barborini reviewed the search warrant with Gillespie.

On a video tape taken by SLCSO Detective George Miller, Gillespie was accidentally caught on tape as he turned the adjacent kitchen light on from the dining room, and he was filmed again later as he sat at the head of the dining table reviewing the warrant. A law enforcement officer in civilian clothing can be seen on the tape standing next to Gillespie, at the table. Gillespie is very obviously handcuffed in front on both occasions. At one point on the tape a voice which is most likely Gillespie's, can be heard making the statement, "Where did you people get this trumped up information" You hear about things like this, and here it is..." This kind of "cocky" attitude was consistent with the descriptions given

*(Continued on page 16)*

## BETRAYED I

ON THE SECOND OF JULY, 1967, Alpha and Bravo companies of the First Battalion, Ninth Marines were on patrol just a few hundred meters south of the D.M.Z. Bravo blundered into a well set ambush at the marketplace; soon, Alpha, too, was in the thick of it.

The enemy consisted of a regiment of the North Vietnamese Army supported by artillery, heavy mortars, rockets, anti-aircraft guns, and surface-to-air missiles. Charlie and Delta Companies were rushed to the field in support, but the outcome had been decided. The Marines were overwhelmingly outnumbered.

But, worse than that, they were equipped with Colt M-16 rifles. Their M-14 rifles, which had proven so effective and durable were stored in warehouses somewhere in the rear. The M-16s would fire once or twice — maybe more — then jam. The extractor would rip the rim off the casing. The only way to clear the chamber and resume firing was to open the bolt, run a cleaning rod down the barrel, and knock the casing loose. This was the rifle supplied to her troops by the richest nation on earth.

The enemy was not so encumbered. They carried rifles which were designed in the Soviet Union and manufactured in one of the poorest nations on earth — the so-called People's Republic of China. Their rifles fired. Every time.

Sixty-four men in Bravo were killed that afternoon. Altogether, the Battalion lost around a hundred of the Nation's finest men. The next morning, we bagged them like groceries. We consigned their bodies to their families and commended their souls to God. May He be merciful. They were courageous. Today they're still tossing the blame back and forth like a hot rock. Was it the fault of the ammo? The fault of the rifle? Neither. It was the fault of the politicians and contractors and generals. They all knew it was a piece of crap. The military didn't want to buy it when Armalite was manufacturing it. But when Colt was licensed as the manufacturer, they suddenly discovered it was a marvelous example of Yankee ingenuity.

But Sgt. Brown told them it was garbage. Col. Hackworth told them it was garbage. And every real Grunt knew it was garbage.

No contractor was ever fined for supplying defective materials. No investigation was ever conducted to uncover the bribes to government officials. No one went to jail. And the mothers of dead Marines were never told that their sons went into combat unarmed.

To all outward appearances, those Marines died of gunshot and fragmentation wounds. **But a closer examination reveals that they were first stabbed in the back by their countrymen.**

The politicians, contractors, and generals have retired to comfortable estates now. Their ranks have been filled by their clones — greedy invertebrates every one. They should pray that God is more understanding than I. Brave men should never be commanded by cowards.

*"I tremble for my country when I reflect that God is just; that his justice cannot sleep forever." —Thos. Jefferson*

When I would muse in boyhood  
The wild green woods among,  
And nurse resolves and fancies  
Because the world was young,  
It was not foes to conquer,  
Nor sweethearts to be kind,  
But it was friends to die for  
That I would seek and find.

I sought them far and found them,  
The sure, the straight, the brave,  
The hearts I lost my own to,  
The souls I could not save.  
They braced their belts about them,  
They crossed in ships the sea,  
They sought and found six feet of ground,  
And there they died for me.

*On July 2nd, I'll plant a large, well composed version of this message at The Wall, directly in front of the names of the men who died on 2July67.*

— Harvey

Editor,

Am I the only one who sees something dreadfully wrong with having "National Sobriety Checkpoint Week" at the same time as the 220th birthday celebration of the freest nation in the history of mankind?

When I hear the word "checkpoint," the very first thing that comes to mind is Checkpoint Charlie, that infamous crossover point between freedom and the tyranny of oppression. The Berlin Wall has been gone for a few years now but it seems that some folks in this country are bent on resurrecting it right here in America. I see the same themes repeated every time one of our precious liberties goes the way of the dodo, that "it isn't much of an inconvenience"; "you will hardly notice"; "its for your own good"; "if it saves just one life...", or the wildly successful "its for the Children." Checkpoints, waiting periods, helmets, seatbelts, random searches, mandatory AIDS and drug tests, on and on, ad nauseam. They all blur together after a while.

Fortunately, in this Republic, even if four out of five people are in favor of something that violates my rights, they can't impose their will on the minority, because, unlike a Democracy, might does not make right and the majority must regard the rights of the individual. Unfortunately, that distinction is becoming blurry as well, and when we cross that line, America will have gone far beyond Checkpoint Charlie.

### The 1996 Presidential Election: A Conspiracy to Bore Me to Death? by Patricia Neill (c 1996)

**Clinton?  
Dole?  
Are they kidding?**

If even a smidgeon of the truth came out about Clinton—Foster, Mena, Paula Jones, etc., then it would be obvious that the only place for Mr. Bill would be jail.

Dole? Well, without Dole, we wouldn't have NAFTA, GATT, the Communications Decency Act (more truthfully known as the "How DARE YOU Steal Our Monopoly On the News Act) or the Government Gets to Commit Even More Terrorism Act (aka the "Anti" Terrorism Act).

And I'm expected to choose one or the other of these two mafiasos? Hell, I rather be honest and vote for Don Corleone. At least we could cut out all of the idiotic bosh-mongering and admit we were simply hiring a thug to run the country. But Clinton and Dole? Who, pray tell, can even tell the difference between the two, besides the

physical fact that Clinton has two arms and (apparently) three legs?

The only difference I can see between the two is that I've read enough to **KNOW** that Clinton is a lying, thieving, cheating scallawag.

With Dole, the evidence that he is one too, has yet to well up from the murky depths.

Frankly, I'd much rather have to make a choice between Ralph Nader and Patrick J. Buchanan. Now, that would be an interesting race, for both men have something to offer. I'd rather see a race among all the contenders: Buchanan, Nader, the Green Party, the Libertarian Party, the Reform Party, the warmfuzzies, and even a guy in Vermont named Dwight Smuck, whose slogan is "put a real Smuck in the White House." That race would be a genuine donnybrook, and worth it. We would have to fight it in earnest.

I want debates about the real issues. Issues I care about. Issues my neighbors care about. Problems people I don't even like care about.

I am tired of these hand-picked, protected-by-the-media and "handled" droids. They bore me to death. And on top of that, they are dangerous to my well-being and the well-being of my country. Both Clinton and Dole have worked (together, at that) to harm people like me—hard-working, taxpaying citizens.

And yet, where is my choice? In this media-orchestrated swill we call a Presidential election, I don't have a choice. And at the same time, I am being lulled into complacency, into passivity, out of sheer self-defense against the veritable mountain of boredom that faces me.

Clinton thinks we should maybe sort of balance the budget in the not so near future. Dole thinks we should maybe sort of balance the budget a little bit sooner than that. ~~~~~

Clinton thinks China should retain MFN even if it bombs Taiwan to smithereens. Dole thinks China should retain MFN even if it bombs Taiwan, but not to smithereens. He wouldn't go quite that far.

Clinton hangs out with Terrorists: Yeltsin (the Butcher of Chechnya) and Peres (the Butcher of Qana). Dole wants to belly up to the bar of that elite club, "PeaceMakers International."

Who are we kidding? This media gurgling over third-raters makes me ill.

This election would be *safer* if all it was, was a conspiracy to bore me to death. After all, being bored to death is how most people choose to die. It is a bit more dicey than that. As one memorable sign-off line has it:

"TweedleBill and TweedleBob — the evil of two lessors."

By the way, if anyone wants to recompense me for my hard work in writing this stuff, please put some bucks **RIGHT NOW** in the mail to help support Bob Starr's family while he's in jail. Mail to:

Octavia Starr  
Rt 1 Box 1143  
Knoxville, Georgia 31050

**Thank you!**  
Patty Neill

## FOOD STORAGE

There are three basic methods to having a food storage program:

- 1) The "Mormon" Method
- 2) The "Survivalist" Method
- 3) The "Farmer" Method

### The "Mormon" method

The Mormons advise, **"eat what you store; store what you eat."** In a word, this method involves having a small grocery store of your own at home. There are several advantages to this approach:

- a) You always have the right combination for any meal. I have experienced disappointment when planning supper only to find we were lacking a key ingredient: i.e., chili, but no beans; spaghetti, but no tomato sauce; etc.
- b) You never run out of anything. When I use the last of the hot sauce, or jelly, I simply get another one out of the food storage. Then that item immediately goes on next week's shopping list.
- c) You can buy in quantity and/or on sale. I had been waiting for months for shampoo and conditioner to go on sale at Kroger's. When it did, I bought 10 shampoos and 14 bottles of conditioner. It cost \$15.00, but at \$.75 each, was a 50% saving by buying a whole years supply.

This is the most convenient approach, since you can start small, and grow or not as budget permits. Allowing \$10.00 for a 2 days supply for the whole family, and shopping every other week, in a years time you would have a 2 months supply for a cost of about \$300. After that your food budget would return to normal. What you would experience is that about 1/2 your groceries would go into the storage area instead of the kitchen cupboard. This doesn't even consider the savings you might realize by buying at opportune times, and at sale prices.

The \$10.00 considered would cover non-food items as well such as; toothpaste, toilet paper, paper plates, soap, etc. Whatever situation that might arise, causing you to use up your food storage, would probably mean a shortage of all other consumable items also.

### The "Survivalist" method

This approach involves buying a **"package deal"** from one of the specialty companies. It would also include a **"do it yourself"** approach with specialty preserved foods. MRE's (Meals, Ready to Eat - the modern version of Army C-rations) would be an example of this type of preserved food. These companies sell pre-packaged plans such as; individual: 6 months, family of 4: 6 months, etc. They also have prepared preserved foods by the case, usually all the same type of foods.

The advantage of this method is it is quick, simple and effortless. The major drawback is it can be expensive, and requires an immediate large cash outlay. Furthermore, if (or when) you ever need to eat this stuff, it might have a **"foreign"** taste. At least with the Mormon method, the foods are familiar to you.

One other consideration for this method is the food usually has an extended shelf life. Some are guaranteed for 20-30 years. Also it is unlikely you would use this food on a regular basis. It is advisable, where practical, to sample it from time to time. For example, you wouldn't think of breaking the seal on a 25# can of wheat, rice, or beans....but you may very well have a few MRE's occasionally. Understand, you can take a **"mix-and-match"** approach to food storage.

### The "Farmer" method

People who garden seriously (meaning home canning of food) have nearly a years supply every November. This method might also call for a root cellar, which today would be considered a novelty. Remembering that refrigeration has only been around for the last 50 years or so, this method means going back in time somewhat.

The chief advantage of this method is cost. There will be a fairly sizable outlay for a presser cooker, canning jars, lids, and preservatives. But comparing the price of garden-raised food with store-bought, it is cheap. Needless to say, it involves a huge expenditure of time and effort.

One should point out that at least a 50 X 100 foot area will be needed for the garden. And this method cannot supply everything you will want and need. Note we are not even considering meats and dairy products.

### SYNOPSIS

Again, the optimum solution is a mixture of all three methods. The most important thing is **START NOW, and DO IT!** You can start the "Mormon method" on your next grocery shopping trip. It is a good idea to have some of the preserved food in stock as they are lightweight, compact and very portable. You are well advised to at least be able to can foods from your own garden, and be experienced in doing so.

(Continued from page 12)

by law enforcement personnel who initially observed Gillespie at the residence. The consensus was that he was at first "cocky," but later calmed down and had several casual conversations with the officers as they went about searching the residence. He was concerned about his turtles at one point, and at another point told an officer that the gun under his pillow was loaded. He gave instructions as to how to unload the firearm. He assisted by furnishing the combination to the safe. According to all witnesses, Gillespie showed no signs of mental instability.

The kitchen area was immediately adjacent to the dining room table where Gillespie spent most of the time sitting. At one point Gillespie asked for something to drink and SAI Steve Kirby gave him iced tea that Gillespie told him about from the kitchen area. Several officers were present with Gillespie at the dining table area throughout the search; however, a picture emerged from the interviews that concern for security became relaxed as service of the warrant ensued. As ATF Agent Barborini expressed, everyone was lulled into a sense of security. An attempt was made during the interview to identify the last person with Gillespie before he was discovered in the kitchen with the firearm, under the theory that each officer at the scene had an obligation to make sure they were leaving Gillespie in the custody of another before they left the room. This "pass off" theory would have made the last person with Gillespie responsible for neglect. At the conclusion of this review, one particular "last officer" was not discovered. There was mixed consensus on which officers were talking with Gillespie at different times. At times those being interviewed only noticed someone near Gillespie with peripheral notice, without notice who the officers were. This report will address the significance of assigning a full time watch on persons in custody under these conditions later; however, sufficient to say at this time that no one officer was identified as having left Gillespie alone at the table. The significant information in this case was the consensus by all interviewed, that no one specific officer was assigned to watch Gillespie.

MACE Detective Gary Oliver said he had been having a conversation beside the dining table with Gillespie earlier during the service of the warrant. He said he was called to the bedroom by MACE Detective Jim Hyde. Detective Oliver said when he walked away there were other officers with Gillespie, but he didn't notice who they were. Detective Jim Hyde was in the process of searching the residence and pointed out to Oliver that excessive ammunition was found. The approximate time was 8:20 AM. Detective Oliver said he left the bedroom to get Agent Barborini, who he thought was in the other room of the residence, as Detective Oliver passed by the kitchen, Detective Oliver saw Gillespie sitting on the floor of the kitchen with his legs crossed. Gillespie was holding a pistol. Detective Oliver said he drew his own duty firearm and pointed at Gillespie. Gillespie said, "You don't need that, put that away." Detective Oliver yelled at Gillespie to "put the gun down." Oliver's loud words alerted almost every law enforcement officer at the residence, including Detective Darin Jones and Agent Barborini who were standing in front of the residence.

Detective Oliver said Gillespie was waiving the gun around, pointing the gun at his (Gillespie's) mouth and waiving it about the room. Detective Oliver said he told Gillespie, "it's not worth it, put the gun down," again. Detective Jim Hyde instructed detective Jones, who had heard Oliver yelling and had entered the residence, to call for a hostage negotiator. Gillespie was alleged to have said, "you people are fucking my life up," and also said something about, "good old Glock," in regards to the firearm he held in his hand. Detective Oliver said he was unable to attract Gillespie's attention. Detective Ken Barrett, also witnessing the event from another adjacent room, said he heard Detective Black from Martin County Sheriff's Office,

start to ask Gillespie about his mother, in an apparent attempt to make Gillespie pause.

Detective Oliver said Gillespie raised the firearm to his temple and fired one shot. No one other than Gillespie fired any shots. Gillespie fell back on the kitchen floor. Emergency Medical Service was called, and Detectives themselves assured that Gillespie was in fact deceased. Since there was no need to move Gillespie, Detective Jones ordered everyone out of the residence, and secured same until IRC SO Crime Scene Detectives arrived. Hence, Gillespie's position as depicted in the crime scene photographs is an accurate representation of how he came to rest.

Other law enforcement personnel actually saw Gillespie sitting on the kitchen floor holding the firearm. These personnel were Detective Jim Hyde, SAI Steve Kirby, Detective Ken Barrett, and allegedly Detective Black<sup>10</sup>.

Law enforcement personnel that heard at least part of the attempts to talk Gillespie into putting the gun down, and also heard the single gunshot afterward, were FDLE Field Supervisor Tim Elder, FDLE Agent Spiropoulos, and Detective George Miller. There were also other ATF Agents and FDLE Agents inside the home involved in peripheral room searches.

IRC SO Crime Scene Detective Tony Oliver witnessed the autopsy performed later by Medical Examiner Dr. Diggs. A single gunshot wound to the head was the only immediate sign of trauma. As of 7/18/96 the Medical Examiner's Official report has not been received due to the toxicology analysis being incomplete; however, there are no suspicions that any new information will be revealed via toxicology. IRC SO Crime Detective Ron Sinclair observed the same projectile that was removed from Gillespie's head during the autopsy, being transferred to Ballistics Expert Mike Kelly. Detective Sinclair confirmed that Kelly compared a test projectile from the Glock 9mm (Serial Number AFK-350).

Numerous photographs were taken of the scene, and the subsequent autopsy process with Gillespie, by both Detective George Miller and Detective Tony Oliver. All were compared with each other in speculative attempts to determine a location where the Glock 9mm could have been in the kitchen. An attempt was also made to compare information with family members. As of 7/18/96 the exact location where the Glock 9mm was has not been determined. It was determined that at the time Gillespie was taken into custody he was searched and secured. Therefore, since the firearm did not originate from Gillespie's person, it had to be in the immediate vicinity of the dining room table. The review determined that Gillespie had to move 8 1/2 feet from the dining room table, to end up where he was sitting in the kitchen.

IRC SO Detective Bob Meadows and IRC SO Armament Expert Paul Harrison examined all law enforcement firearms at the scene to determine the status of each, and primarily determine if any had been fired. SAI Steve Kirby had used a back-up .38 to shoot a snake at his residence and the chamber had one spent round. No other firearms had been fired.

ATF Agent Bill Jurison was assigned to the search warrant service at Rosenzweig's north residence. At one point Rosenzweig asked if Gillespie was dead. He was told that Gillespie was deceased. Rosenzweig told officers that he and Gillespie had a suicide agreement pending any law enforcement involvement over their activities. According to FDLE Agent Field Supervisor Tim Elder, there is evidence of Rosenzweig's statement in regards to this matter on tape.

(Continued on page 17)

(Continued from page 16)

James Kennedy, 2407 15th Avenue Vero Beach, a self-proclaimed friend of Allan Gillespie's, confirmed that Gillespie did have a Glock 9mm that Gillespie was very proud of the firearm. Kennedy said Gillespie had exhibited no signs of mental instability, and that Gillespie had a lot to look forward to, with a new daughter. Kennedy said the Glock was Gillespie's favorite gun.

Interviews with other friends of Allan Gillespie's indicated surprise that he was alleged to have committed suicide, and a general consensus that he hadn't exhibited any signs that suggested he had suicidal potential. One friend, Eric Kincel, who worked with Gillespie, said that Gillespie had been acting depressed over problems with Knight's Armament, and had recently expressed strange interest in a new world order. Kincel said it was common knowledge that Gillespie had a Glock 9mm which he used to carry on his person, up until about six months ago. Kincel said Gillespie kept the Glock 9mm on top of the refrigerator in the kitchen.

Systematically, during the investigation, persons were questioned whether they had seen any areas of negligence on the part of personnel from Indian River County Sheriff's Office - negligence such as potential failure to pay attention at briefings, or at any point during the operation. All persons questioned declared that IRCSO personnel were professional and attentive during all aspects of the operation.

### CONCLUSION OF FACT

This review is limited to an evaluation of Indian River County Sheriff's Department Personnel involved in the assist of the ATF Search Warrant. It is not an attempt to evaluate anything beyond the involvement of IRCSO, even though some actions may be mentioned herein where they influence IRCSO personnel.

IRCSO CID determined that the event was a suicide. IRCSO IA agrees with that conclusion based on the review information.

A review of the incident concludes that IRCSO personnel did not violate any IRCSO policies or procedures. In most cases this would imply that there are no better ways of doing things beyond mere compliance with policy. It is impossible to reduce every single contingency into policy; hence, the common evolution of all law. While there are no policy violations, it is obvious in this review that Gillespie's having the ability to obtain a firearm within the

environment created by the search warrant service had devastating consequences, and had the extreme potential to have even further devastating consequences in so far as officer safety. Since there were no signs of mental instability exhibited by Gillespie, law enforcement had no extra obligation to resort to suicide watches, such as incorporated within the jail. However, Gillespie's survival within these circumstances could have been a byproduct of the law enforcement officers' concern for their own safety.

(Signature)

Lieutenant Phil Williams

### FOOTNOTES

- 1 ATF, 5113 Leesburg Pike #200, Falls Church, Va. 22041, #703-756-698
- 2 The equivalent of IRCSO internal Affairs in that the primary function is to determine what policies were violated, if any, by involved law enforcement officials from the investigators agency, and determine if policy changes are needed to avoid similar problems in the future
- 3 ATF Office, 505 South Flagler Drive Suite #402, West Palm Beach, FL 33401
- 4 Fort Pierce Field Office, Depo Drive. Ft Pierce, FL.
- 5 Fort Pierce Field Office
- 6 19th Judicial Circuit State Attorney's Office, 411 South 2nd St. Ft. Pierce, FL 34950
- 7 St. Lucie County Sheriff's Office, Crime Scene Unit, 4700 West Midway Rd., Ft. Pierce, FL 34981
- 8 Note that Agent Riehl had not been interviewed as of 7/18/96
- 9 Secured meaning that IRCSO ERT had made sure no one was inside the residence, and two bomb experts from Martin County Sheriff's Office had checked the residence over
- 10 Who was on vacation after this event and was not interviewed as of 7/18/96
